

Profile Tube Lubrication

With the new Profile Tube Lubrication System, GKN Walterscheid responds to market requirements: Improved handling and minimised maintenance efforts.

Profile Tube Lubrication is distinguished by:

- > Excellent accessibility of lubrication points
- > All lubrication points are aligned in one plane
- > Optimal lubrication irrespective of length and position
- > Even distribution of the lubricant via just one grease nipple

Available for the following profile tubes:

1b/2a

1bGA/2aG

S4/S5, S4H/S5, S4LH/S5, S4V/S5

S4GA/S5, S4LGA/S5, S4VGA/S5
