

PRESS RING CONNECTION FOR SLIDING RING "Z"

The intermediate bearing for PTO drive shaft guards from Walterscheid is further improved by the new press ring connection for sliding ring "Z".

The advantages of the new design:

- > Patented bearing design
- > Simple mounting
- > Improved bearing characteristics
- > More resistant to shock loads
- > Longer life in critical applications
- > Backwards compatible for twin-rib profile tubes
- > Lead-in chamfer for easy mounting of the PTO drive shaft guard
